TUGAS MANDIRI

The screenshot shows an IDE window titled "TugasMandiriAbidzar.java". The code is a Java program that implements a simple math menu. It imports `java.util.*` and `java.lang.Math`. The `main` method displays a menu with three options: addition, subtraction, and division. It prompts the user to choose an option and then to enter two numbers. Based on the choice, it performs the corresponding operation and prints the result. The code uses `Scanner` for input and `System.out.println` for output.

```
12 import java.util.*;
13 import java.lang.Math;
14
15 public class TugasMandiriAbidzar {
16     private static Scanner input = new Scanner(System.in);
17
18     public static void main(String[] args) {
19         int pilihan;
20         double angka1, angka2, hasil;
21
22         System.out.println("menu belajar matematika andi");
23         System.out.println("1. pertambahan");
24         System.out.println("2. pengurangan");
25         System.out.println("3. pembagian");
26         System.out.println("pilih menu (1/2/3)");
27         pilihan = input.nextInt();
28         System.out.println("masukkan angka pertama: ");
29         angka1 = input.nextDouble();
30         System.out.println("masukkan angka kedua: ");
31         angka2 = input.nextDouble();
32         if (pilihan == 1) {
33             hasil = angka1 + angka2;
34             System.out.println("hasil : " + hasil);
35         } else {
36             if (pilihan == 2) {
37                 hasil = angka1 - angka2;
38                 System.out.println("hasil : " + hasil);
39             } else {
40                 if (pilihan == 3) {
41                     hasil = angka1 / angka2;
42                     System.out.println("hasil : " + hasil);
43                 } else {
44                     hasil = angka1 * angka2;
45                     System.out.println("hasil diluar menu: " + hasil);
46                 }
47             }
48         }
49     }
50 }
```

```
Output - Run (TugasMandiriAbidzar) X  TugasMandiriAbidzar.java X

menu belajar matematika andi
1. penambahan
2. pengurangan
3. pembagian
pilih menu (1/2/3)
9
masukkan angka pertama:
5
masukkan angka kedua:
5
hasil diluar menu: 25.0
